# CJC FILTER INSERT EXTRACTOR

To facilitate the job of changing filter inserts in CJC Fine Filters and Filter Separators we have produced a **CJC Filter Insert Extractor** as shown above.

The **CJC Filter Insert Extractor** is led over the stay bolt in closed position, and the insert can now be removed in sections by lifting the two handles.

The changing of inserts as shown above is hereby done easier and cleaner.

Therefore, do not forget to order a **CJC Filter Insert Extractor** when ordering inserts next.
